

Taleb Australia Sustainability Policy

Taleb has initiated the following practises to support the growing community concern for climate change:

- Our St Peters factory is powered by our own solar panels on our factory roof.
- We are committed to replacing our fleet of vehicles with electric vehicles by 2026. Currently 25% of our fleet is electric charged by 100% green energy.
- Recycling of waste materials. We sort out waste / rubbish and get a cardboard pickup using the blue cardboard bin collection.
- Customers have the option to choose how their product is packaged, however we encourage the minimization of paper, plastic and cardboard packaging.
- We have developed practises in our cutting process to minimize material waste.
- We invite customers to recycle coat hangers and cartons.
- Customers have the option to choose how their product is packaged, however we encourage the minimization of paper, plastic and cardboard packaging.
- The toilet paper we use at the factory is 100% recycled.
- We usage electronic storage of information to minimize paper usage. Paper used for printing is 100% recycled.
